The 10-Point SEO Checklist: Is Your Website Invisible to Jamestown Customers?

Use this actionable checklist to discover what's holding your website back from dominating local search results.

1. Google Business Profile Audit

- ✓ Is your profile claimed and verified?
- ✓ Do you have at least 10 high-quality photos uploaded?
- ✓ Are you responding to every review (even the bad ones)?

2. The "Mobile-First" Test

- ✓ Does your site load in under 3 seconds on a 4G connection?
- ✓ Are buttons large enough to tap with a thumb?

3. The H1 Header Check

- ✓ Does your main headline include your primary service + your city? (e.g., "Plumber in Jamestown, NY")

4. NAP Consistency

- ✓ Is your Name, Address, and Phone identical on your website, Facebook, and Google Maps? (Even "St." vs "Street" matters!)

6. Image Optimization

- ✓ Are your images huge files slowing down the site?
- ✓ Do they have descriptive "Alt Text" for Google's bots?

7. Content Depth

- ✓ Do your service pages have at least 500 words of helpful, expert information?

8. Internal Linking

- ✓ Do your pages link to each other, or are they "islands" that Google can't navigate?

9. SSL Security

- ✓ Does your URL start with HTTPS? (Google will flag "Not Secure" sites and scare away customers).

5. Meta Title & Description

✓ Do your search results actually "sell" the click, or are they just the name of the page?

10. The Call to Action

✓ Is there a clear, bold button on every page telling the user exactly what to do next?
